NUCLEAR PHYSICS B

VOLUME B250 (1986) No. 5

ISSN 0550-3213
APRIL 1986

PARTICLE PHYSICS

Journal devoted to the experimental and theoretical study of the fundamental constituents of matter and their interactions

Associate Editors: N. Cabibbo, Rome; D. Cline, Wisconsin; R.H. Dalitz, Oxford; S. Glashow, Harvard; R.J. Glauber, Harvard; V.N. Gribov, Moscow; D. Gross, Princeton; L.M. Lederman, Fermilab; G. Mack, DESY; R.G. Moorhouse, Glasgow; R.J.N. Phillips, Rutherford; C. Rubbia, CERN; G. Steigman, Bartol; G. 't Hooft, Utrecht; S.C.C. Ting, DESY-MIT; S. Weinberg, Texas; J. Weyers, Louvain; B. Wiik, DESY; F. Zachariasen, CALTECH; J. Zinn-Justin, Saclay

Supervisory Editors: G.C. FOX, J.ILIOPOULOS, H.J. LIPKIN, D.R.O. MORRISON, H.R. RUBINSTEIN, M. VELTMAN

Administrative Editors: K. Jones, W. Hass

FIELD THEORY and STATISTICAL SYSTEMS

Journal devoted to *common* problems in Field Theory and Statistical Mechanics

Associate Editors for Field Theory and Statistical Systems:
C. Itzykson, Saclay; L. Kadanoff, Chicago; J.S. Langer, Santa Barbara; A. Luther, Copenhagen; G. Parisi, Frascati; A.M. Polyakov, Moscow; R. Savit, Ann Arbor; H.E. Stanley, Boston; F. Wegner, Heidelberg

Administrative Editors:
K. Jones, W. Hass

NORTH-HOLLAND

NOTE TO AUTHORS

Contributions for Nuclear Physics B should be sent in duplicate to the Editorial Office of "Nuclear Physics", Nordita, Blegdamsvej 17, DK-2100 Copenhagen Ø, Denmark, *Contributions from the USA* may be sent also to one of the following associate editors: Prof. D. Cline, Dept. of Physics, University of Wisconsin, 457 North Charter St, Madison, Wisc. 53706, Prof. D. Gross, Dept. of Physics, Princeton University, Jadwin Hall, P.O. Box 708, Princeton, N.J. 08540, and Prof. F. Zachariasen, Caltech, Pasadena, Cal. 91109. They should be accompanied by a covering letter, indicating, in case of joint authorship, to whom further correspondence, proofs, etc. should be addressed. Authors should take care that their contributions are written in good English; "broken English" is not acceptable.

Manuscripts for Nuclear Physics B should be prepared in accordance with the rules and conventions outlined in **Instructions to Contributors** which appear on the rear inside cover of most issues.

All papers are subject to refereeing. "Letter-type" contributions and unnecessarily long papers are unacceptable. Authors should make every effort to achieve the utmost concision compatible with clarity. They should make a careful survey of the literature to ensure that papers do not duplicate previous work and that relevant existing knowledge has been taken into account. It should be realised that the criteria for refereeing are very high. *At present only 50% of the papers submitted are immediately acceptable.*

The Editors and Publishers aim at the following *time schedule*: within one week of submission the Author should have received acknowledgement of receipt of his manuscript. Within two months (normally within one month) he should have had notification of acceptance or rejection, or a request for revision. After receipt of an acceptance card, he should receive proofs within six weeks. Finally, six weeks after returning the corrected proofs, the paper should be published. If this schedule is not adhered to, Authors are requested to notify the Editorial Office and/or the Publisher.

NUCLEAR PHYSICS A is published in weekly issues. The subscription price per volume is Dfl. 419.00 Postfree.

NUCLEAR PHYSICS B (including B [FS]) is published in weekly issues. The subscription price per volume is Dfl. 419.00 Postfree. Combined subscription to both section A and B (including B [FS]) is Dfl. 344.00 Postfree.

NUCLEAR PHYSICS B [FS] (Field Theory and Statistical Systems) is published in twelve issues per year. The subscription price per volume of four issues is Dfl. 450.00 Postfree.

SUBSCRIPTIONS should be sent to the Publishers, Elsevier Science Publishers B.V., Journals Department, P.O. Box 211, 1000 AE Amsterdam, or to any subscription-agent.

CLAIMS FOR ISSUES NOT RECEIVED should be made within three months of publication. If not, they cannot be honoured free of charge.

BOOKS FOR REVIEW should be sent to the Editorial Office of "Nuclear Physics".

Niels Bohr Collected Works

General Editor: ERIK RÜDINGER, *The Niels Bohr Archive, Copenhagen, Denmark*

Volume 5: The Emergence of Quantum Mechanics

edited by KLAUS STOLZENBURG, *Hermann Hesse Gymnasium, Calw, F.R.G.*

1984 xx + 528 pages
Price: US $96.25/Dfl. 250.00
Subscription Price: US $81.50/Dfl. 212.50
ISBN 0-444-86501-2

This volume deals mainly with the period 1924–1926, which marks the transition from the old quantum theory to quantum mechanics. New experimental and theoretical evidence made it clear to Bohr and others that the theory had to be modified, but the question was, what were the new hypotheses required? The light quantum hypothesis seemed necessary to explain the Compton effect and stood side by side, and apparently conflicting with the wave theory. The question of the true nature of light – wave or corpuscle – came into the foreground and was above all discussed by Einstein and Bohr. Since Bohr's correspondence throws considerable light on this whole development, a large selection of these letters is included.

Part I deals with the Bohr-Kramers-Slater theory and the subsequent work by Bohr as well as by Kramers and Heisenberg. The difficulties in the old quantum theory were to be overcome by abandoning the theorems of conservation of energy and momentum. However, after the experiment of Bohr and Gieger, Bohr had to give up this attempt as he made clear in the "Addendum" to his paper "On the Behaviour of Atoms in Collisions" from 1925.

Part II concerns Bohr's reaction to Heisenberg's new quantum mechanics. Besides documenting Bohr's very enthusiastic response to this development, it is shown how Bohr helped with the break-through of Goudsmit and Uhlenbeck's fundamental idea of the electron spin, especially by convincing the main opponents, Pauli and Heisenberg, of the correctness of this new, revolutionary concept which he himself was to discuss so thoroughly in the following years.

CONTENTS: **Part I:** The Theory of Bohr, Kramers and Slater. **Part II:** Matrix Mechanics and Spinning Electrons. **Part III:** Selected Correspondence (Mainly 1924–1926). Index.

STUDIES IN STATISTICAL MECHANICS, Volume 12

The Wonderful World of Stochastics

A Tribute to Elliott W. Montroll

edited by MICHAEL F. SHLESINGER *and* GEORGE H. WEISS

1985 xiv + 382 pages Price: US $45.00 / Dfl. 140.00 ISBN 0-444-86937-9

Elliott W. Montroll had a profound influence on physics, beginning with his classic works on imperfect gases, the Ising model and lattice dynamics in the early 1940's. His innovatie research continued over the next four decades with work ranging from the flow of electrons in amorphous semiconductors, to the flow of traffic on highways. This memorial volume contains ten original contributions by noted scientists on statistical and mathematical physics, a bibliography and review of Montroll's works, plus reprints of twelve of Montroll's classic papers.

Excerpt from the Preface:
'There are gifted scientists and there are people endowed with the ability to bring pleasure to any gathering. Elliott Montroll belonged to that rare group who possess both.' Joel L. Lebowitz

CONTENTS: Preface to the Series. Preface. Contents of previous volumes. **I.** Elliott W. Montroll (May 4, 1916 - December 3, 1983) *(M.F. Shlesinger and G.H. Weiss).* **II. List of publications of Elliott W. Montroll. III. Invited Contributions.** 1. Dielectric relaxation via the Montroll-Weiss random walk of defects *(John T. Bendler and Michael F. Shlesinger).* 2. The fascinantion of old texts *(Cyril Domb).* 3. Some statistical and dynamical problems in quantum electronics *(F.T. Hioe).* 4. Theory of diffusion via an interstitial and vacancy mechanism *(Paul H.E. Meijer).* 5. Mathieu difference equations *(Renfrey B. Potts).* 6. Mayer-Montroll equations (and some variants) through history for fun and profit *(G. Stell).* 7. Illumination in a random medium *(N.G. van Kampen).* 8. Random walks in crystallography *(George H. Weiss and James E. Kiefer).* 9. On the quantum Langevin equation: The linear oscillator *(Bruce J. West and Katja Lindenberg).* 10. Some inequalities for anisotropic rotators *(J. Bricmont, J.L. Lebowitz and C.F. Pfister).* **IV. Reprints of Elliott W. Montroll.** Some notes and applications of the characteristic value theory of integral equations (Abstract of a Doctor's Dissertation, University of Pittsburgh Bulletin, Vol. 37, no. 3, 1971). Statistical mechanics of imperfect gases *(with J.E. Mayer)* (J. Chem. Phys. 9, 1941). On the theory of markov chains (Ann. Math. Stat., 28, 1947). Frequency spectrum of crystalline solids (J. Chem. Phys., 10, 1942). Effect of defects on lattice vibrations: Interaction of defects and on analogy with meson pair theory *(with R.B. Potts)* Physical Rev., 102, 1956). Poincare cycles, ergodicity and irreversibility in assemblies of coupled harmonic oscillators *(with P. Mazur)* (J. Math. Phys., 1, 1960). Studies in non-equilibrium rate processes I: The relaxation of a system of harmonic oscillators *(with K.E. Shuler)* (J. Chem. Phys., 26, 1957). Random walks on lattices II *(with G.H. Weiss)* (J. Math. Phys., 6, 1965). Generalized master equations for continuous-time random walks *(with V.M. Kenkre and M.F. Shlesinger)* (J. Stat. Phys., 9, 1973). Anamalous transit-time dispersion in amorphous solids (with H. Scher) Phys. Rev., B12, 1975). Traffic dynamics: Studies in car following *(with R.E. Chandler and R. Herman)* (Operations Research, 6, 1958). Social dynamics and the quantifying of social forces (Proc. Nat. Acad. Sci. (USA), 75, 1978).

INSTRUCTIONS TO CONTRIBUTORS

1. The manuscript should be submitted in duplicate and should be typewritten on one side of the paper only, with wide margins and double spacing. The manuscript must be accompanied by original figures, and by manuscript-sized copies, if the originals are large.

2. The footnotes (as few and as short as possible) should be typed at the foot of the page on which they are indicated. PLEASE DO NOT MIX FOOTNOTES AND REFERENCES.

3. The reference list should comply with the following points:
   Reference to a paper
   [1] S.L. Glashow, J. Iliopoulos and L. Maiani, Phys. Rev. D2 (1970) 1285;
   L.P. Kadanoff and A.B. Zisook, Nucl. Phys. B180 [FS2] (1981) 61

   Reference to a book
   [2] C. Itzykson and J.-B. Zuber, Quantum field theory (McGraw-Hill, New York, 1980) 1

   Reference to a conference report
   [3] UA1 Collaboration, presented by K. Eggert, Proc. Int. Europhysics Conf. on High energy physics, Brighton, U.K., 1983 (Rutherford Appleton Laboratory, Chilton, Didcot, U.K., 1983) 447

   Reference to a laboratory report
   [4] K. Symanzik, DESY internal report T-71-1 (1971) 1

   Reference to a preprint
   [5] G. Zweig, CERN preprints TH 401, 402 (1964)

4. Three vectors should be wavy underlined. Four-vector scalar products should be indicated with a (raised) period.

5. Clear distinction between 0 (zero), O (Capital), o (lower case), 1 (one), l (lower case), x, × (multiplication); S, P (Capital); s, p (lower case), etc., should be made.

6. The correct abbreviations of some commonly abused units are: sr, fm, GeV, keV, mb.

7. It would be extremely helpful if all Greek letters were underlined in red.

PAUL EHRENFEST

Volume 1

The Making of a Theoretical Physicist

by MARTIN J. KLEIN, *Yale University, Yale, NH, U.S.A.*

1970 2nd repr. 1985 as a paperback xvi + 330 pages
Price: US $22.50 / Dfl. 75.00
ISBN 0-444-86948-4

A COMMENT FROM THE PRESS:

'This book . . . is both a fascinating biography and an important contribution to the history of modern physics . . . an extraordinary and almost unique example of a scientist's biography. The whole book bears witness to Klein's accuracy and diligence . . . This book should be read by everyone interested in the history of the development of modern physics . . . I should also like to see it in the hands of many nonphysicists.'

H.B.G. Casimir,
Physics Today

Born in 1880 and Professor of Theoretical Physics at the University of Leiden from 1912 until his death in 1933, Paul Ehrenfest played an essential and unique role in the revolutionary developments of physics in this century.
This volume covers Ehrenfest's life and work up to 1920: his childhood in a Jewish family in Vienna, his student years in Vienna and Göttingen, and the five years he spent in Russia before World War I. In 1912 he succeeded H.A. Lorentz at Leiden and his early years there are covered in detail. He was a close personal friend of Albert Einstein and the first decade of this friendship is portrayed through their correspondence.

CONTENTS: Introductory Note. Chapters 1. The New Professor at Leiden. 2. Childhood in Vienna. 3. Student Years. 4. A Dissertation on Mechanics. 5. Göttingen and Petersburg. 6. The Critic of Statistical Mechanics. 7. A Theoretical Miscellany. 8. The Search for a Position. 9. Early Years in Leiden. 10. The Essential Nature of the Quantum Hypothesis. 11. The Adiabatic Principle. 12. Einstein and Ehrenfest. Index.
